# A MESSAGE TO FAMILIES

Happy New Year to you and your family from our families!

We've created this newsletter to offer families more insight into the workings of remote 6th grade Math. In Math, it's not always about finding the correct answers. It is about explaining the process or journey of finding the answer. We encourage students to dig deeper and explain their Math ideas in a variety of ways. We encourage students to be curious and fight to understand the why behind every answer.

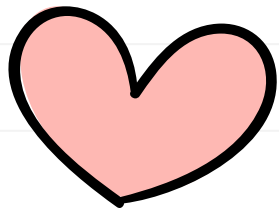

In this newsletter, you'll find the following:

- An overview of Unit 2: Fractions.
- Learning goals
- Upcoming Math assignments
- Supports for students

If you have any questions, please contact your child's teachers.

All the best,

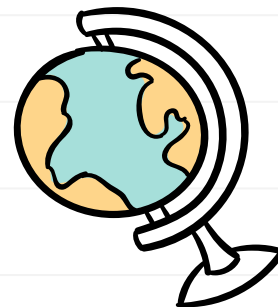

6th Grade Math Team

**"IT'S NOT ABOUT PERFECTION, IT'S  
ABOUT PROGRESS"**

—Someone Famous  
aka Ms. Moore  
(I got it from my elders.) 😊

Students

# OVERVIEW 6TH GRADE REMOTE MATH

WHAT HAPPENS IN  
REMOTE MATH CLASS?

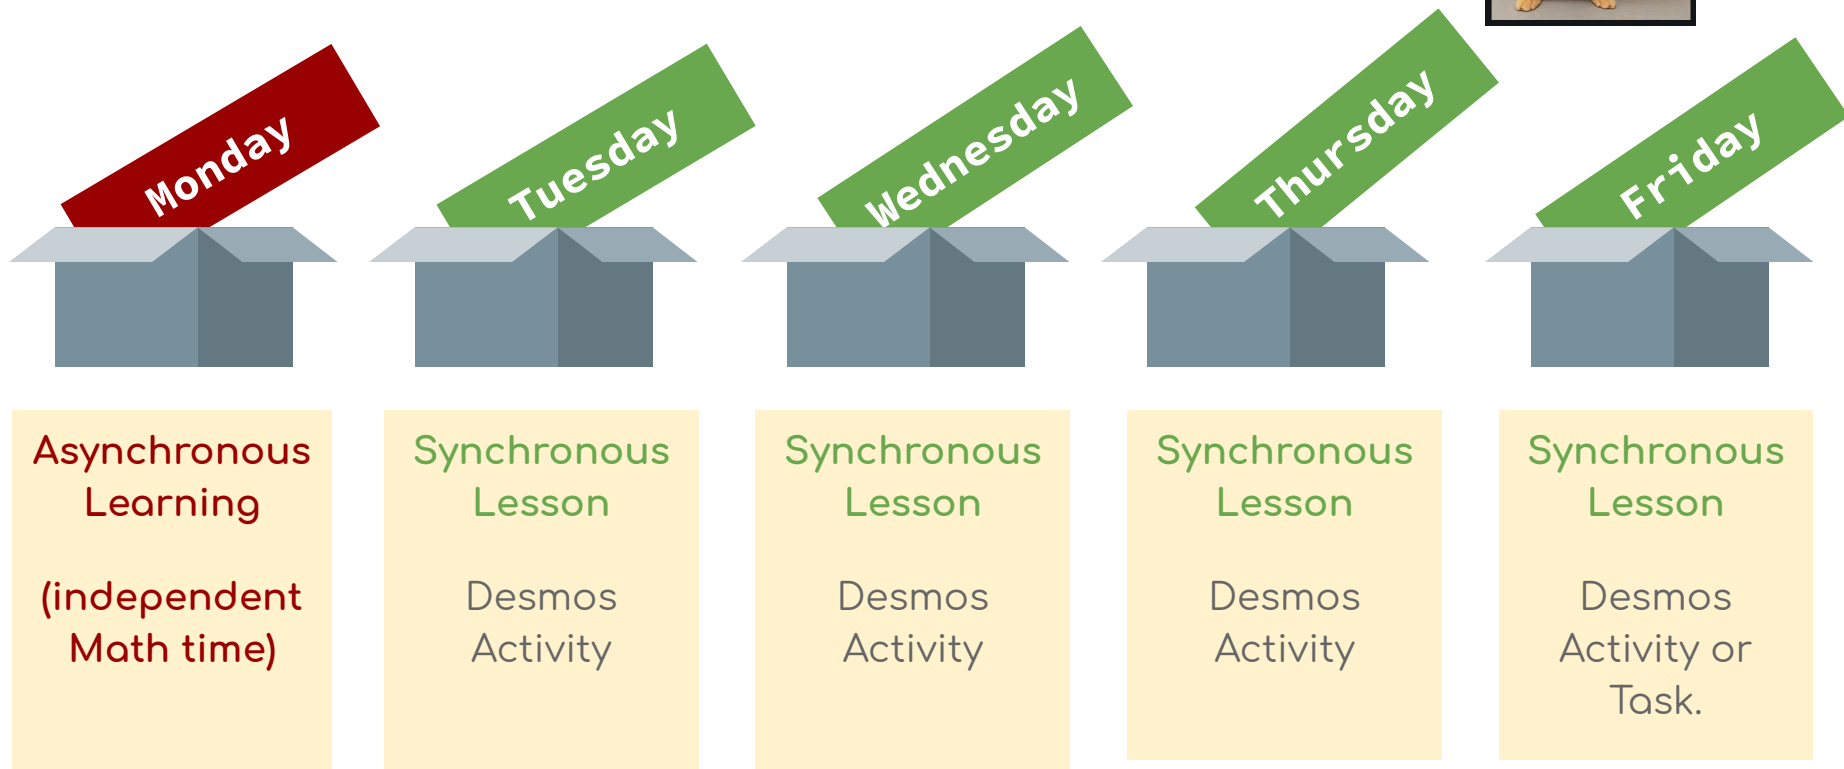

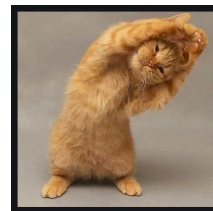

GLAD YOU ASKED!

# TIMELINE OF MATH WEEK\*

(CHANGES OCCUR. BE FLEXIBLE.)

\*EVERY PACK DOES NOT HAVE MATH EVERY DAY. STUDENTS SHOULD FOLLOW THEIR PACK SCHEDULE.

# ZOOM CLASS PROCESS

01

On synchronous days, students complete part of the activity independently before the class starts.

02

Students join Zoom class for a mini-lesson and a class discussion.

03

Students continue to work on activity sometimes independently and sometimes in breakout rooms

04

As a class, students share out the second part of the activity, say bye bye and see you next class.

If students do not finish the activity in class, they should work on it independently.

Be brave!  
Share  
your Math  
ideas!

# IN CLASS

## Showing Work

6th grade Math is about sharing our Math ideas in variety of ways from models to equations to written explanations and so much more.

## Progress vs. Perfection

Getting the correct answer is not the endgame, it is just the beginning.

## Assessment

Each week students will be assessed on preselected Math [learning goals](#) (click [here](#) for the entire document).

## Classwork

For each class, students are expected to complete a desmos activity and sometimes a Math task.

Students should advocate for themselves and ask for help whenever they need it.

## Zoom Class

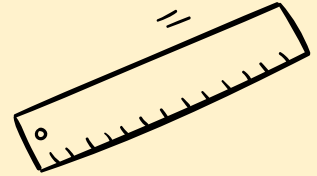

During each class, teachers will share with students which learning goal(s) they will be assessed on.

This gives students the opportunity to complete the activity in a thoughtful manner and ask for help whenever they need it.

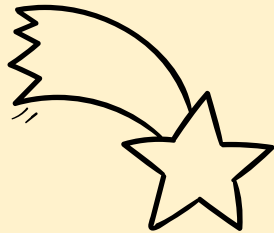

dividend

# 2ND UNIT OF STUDY: FRACTIONS

divisor

quotient

# UNIT 2: FRACTIONS

IT'S ABOUT ....

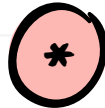

solving fraction problems using a variety of operations.

noticing patterns and determining how the size of the divisor affects the size of the quotient.

using models, the standard algorithm and written explanations to showcase our Math ideas.

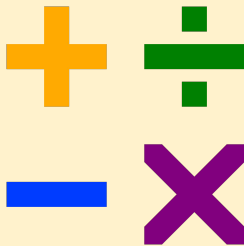

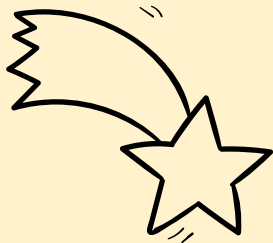

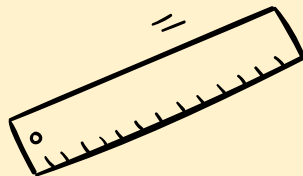

It's about persevering through challenging assignments.

*Think outside of the box when representing our answers.*

# LEARNING GOALS

# LEARNING GOALS ARE DESIGNED TO...

Give students the chance to self-assess their own learning.

Help students develop self-advocacy skills. *When they don't understand something, they can ask for help.*

Give Math teachers information that helps us provide more one-on-one support to students who need it. *We can also see which students are ready for more in-depth work.*

Provide talking points for Math communication between students and teachers and families and students.

# FREQUENTLY ASKED QUESTIONS ABOUT LEARNING GOALS

First of all...

Are students assessed on all the learning goals each class?

**Answer:** Students are not assessed on all the Math learning goals. They are assessed on 1 or 2 of the goals each class.

How do students know which learning goal they are being assessed on?

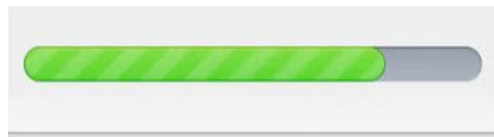

**Answer:** Teachers share with students during each class which learning goals they are being assessed on.

Which assessments are used to assess students on the specific learning goals?

**Answer:** Students are assessed on different questions in the Desmo activity for that particular day.

# LEARNING GOALS

G6 Math Unit 2 - Fractions	Learning Goal #				
Common Core Standard	1	2	3	4	5
(CCS.MATH.5.NF.1) Add & subtract fractions with like & unlike denominators (including mixed numbers).	X	X			
(CCS.MATH.5.NF.4) Apply and extend previous understandings of multiplication to multiply a fraction (or whole number by a fraction).		X	X	X	
(MS447.NY-6.NS.1) Apply and extend previous understandings of multiplication and division to divide fractions by fractions. (Interpret and compute quotients of fractions, and solve word problems involving division of fractions by fractions.)			X	X	X
(CCS.MATH.6.RP.3) Use ratio and rate reasoning to solve real-world and mathematical problems.	X				
(MS447.NY-MP.1) Make sense of problems and persevere in solving them.	X	X	X	X	X
(MS447.NY-MP.4) Model with mathematics.	X	X	X	X	X

# LEARNING GOAL #1 & MATH ASSIGNMENTS

## Learning Goal 1

Week of 1/4/21  
(work assigned throughout the  
week. Not all in one day.)

I can use mathematical models to  
represent fractions in different  
ways

- Desmos: Building Fractions
- Desmos: Introducing Fractions
- Desmos: Preview Unit 2
- Tasks
  - Going Marbles
  - Desmos: Adding Fractions Progression

# LEARNING GOAL #2 & MATH ASSIGNMENTS

## Learning Goal 2

Week of 1/11 (work assigned throughout the week. Not all in one day.)

When dividing, I know how the size of the divisor affects the size of the quotient.

- Desmos: Size of Divisor and Size of Quotient
- Tasks
  - Penny's Pieces
  - Cookie Jar

# LEARNING GOAL #3 & MATH ASSIGNMENTS

## Learning Goal 3

Week of 1/18  
(work assigned throughout the  
week. Not all in one day.)

I can use tape diagrams, fact families, and equations to represent the meaning of division. (A division equation answers either “How many groups?” or “How many in each group?”)

- Desmos: Meanings of Division
- Desmos: Interpreting Division Situations
- Task
  - Rabbit Costumes

# LEARNING GOAL #4 & MATH ASSIGNMENTS

## Learning Goal 4

I can use models and equations to represent division situations involving fractions and find the number of groups (or the number in each group).

Week of 1/25  
(work assigned throughout the week. Not all in one day.)

- Desmos: Pattern Block Piles
- Desmos: How Many Groups Part 1
- Desmos: How Many Groups Part 2
- Task
  - Share My Candy

# LEARNING GOAL #5 & MATH ASSIGNMENTS

## Learning Goal 5

Week of 2/1  
(work assigned throughout the  
week. Not all in one day.)

I can use an algorithm to divide  
fractions.

- Desmos: Dividing by Unit and Non-Unit Fractions
- Desmos: Using an Algorithm to Divide
- Desmos: Dividing Fractions Progression & Practice
- Task
  - Merry Models

SUPPORTS  
FOR  
STUDENTS

We're here to help!

# SUPPORTS FOR STUDENTS

If...	Then...
Students need help with an assignment,	Make an appointment to come to office hours. (Mondays to Fridays 2:30-2:50 p.m. or Mondays 9:45-10:33 a.m.)
Students are ready for more challenging work,	Check in with your teacher to find out what additional work is available to complete. Or, independently dig deeper by finding new strategies to solve a problem.
Students are absent for a class,	Check Google classroom for the assignment or contact a classmate. Any additional questions, check in with your teachers.
Students need tech support (device is broken),	Contact your pack leader or Math teachers. MS447 is able to provide devices for students who need it.
Students need more Math practice or help,	Visit <a href="https://www.khanacademy.org/">https://www.khanacademy.org/</a>
